

ALI Imagery of a Landslide in Maierato, Italy (Mar. 2010)

March 14, 2010
True-Color Image from ALI
Landslide in Maierato, Southern Italy

The landslide slide occurred on February 16, 2010 and may have been caused by heavy rain. The freshly exposed soil is pale tan. The slide occurred on the west side of the town. A comparison of the two images reveals that the slide buried several roads, but the area did not appear to be populated. About 200 residents of Maierato were evacuated.
